# HOSPITALITY

## Ozone Industries Series 3000 UV ozone generators efficiently destroy bacteria, virus, smoke odours, mould, mildew & fungus.

Are you responsible for the atmosphere of a club, pub, an apartment, resort, hotel complex, retirement or nursing home?

- Create a pleasant environment for your service staff.
- Improve the air quality of your premises.
- Sanitise without the use of chemicals.

**Ozone does not cover up smells, it eliminates them. Ozone leaves an odour of.....'NOTHING'.**

Destroy bacteria and odours from sources like:

- Cooking
- Smoking
- Pets
- Urine
- Sewerage
- Paint fumes
- Water damage
- Pesticides
- Decaying matter

Eliminate them from your:

- Cabins
- Apartments
- Basements
- Bars
- Toilets
- Warehouses
- Garbage Areas
- Cool Rooms

## What is OZONE?

The Ozone Industries Series 3000 UV generators produce natural Ozone. Ozone is a very powerful oxidant and an ideal chemical-free disinfecting agent.

Ozone is far more effective in destroying odours than chemicals because it actually kills the bacteria and destroys the chemical compounds responsible for the smell instead of just masking one smell with another.

Ozone is a naturally occurring gas created from oxygen atoms. The oxygen molecules are broken into atoms by UV light at a particular frequency. They then recombine into loosely bonded tri-atomic oxygen known as 'ozone'. Ozone has been known about for most of the 20th century with the technology of recent years finally allowing it to be generated efficiently.

Ozone Industries is a brand of **IBC Water**

Since 1888, IBC Water has a proud tradition in the supply of filtration and water conditioning products for commercial, industrial and residential application.

**Ozone is nature's own chemical-free disinfectant.**
